

How to Install Your E-ZPass Transponder

- 1 Sit inside your vehicle facing forward. Select a location behind and to the right of the rearview mirror. The spot should be at least 1" below the vehicle's frame and at least 1" to the right of the rearview mirror, and not within any tinted area. The area should be clean and dry.
- 2 Do not remove the adhesive fasteners from your transponder. Simply peel off the plastic backing to reveal the sticky surface of the fasteners.
- 3 With the E-ZPass logo facing you, right-side up, affix the entire E-ZPass assembly to the selected spot on the inside of your windshield.
- 4 Press the entire transponder assembly firmly into place and hold for two seconds. The installation process is now complete.

Additional fasteners are available in the event you want to transfer your E-ZPass transponder to another two-axle vehicle listed on your account.

Note: If you mount your E-ZPass improperly, it's not in your vehicle, or your account is not funded, you may not be receiving E-ZPass Maryland savings. You may also incur video tolls.
